### INTRODUCTION:

This is one of the standard print-outs of the Family Tree Maker Genealogical Software.

The print-out is generated from data as encoded into the Database from the various sources over the years. Latest updates were from Tony Alcantara of Davao.

The Database is a project to trace the inter-relational linkages between major families in the Tanjay area., by bloodline or marriage.

Data may not be accurate, as much of it, especially those of the older generations, are taken from statements of the younger folk.

Where the exact the date of birth (DOB) is unknown, the data is “guestimated” by interpolation.

The format of the print-out is as follows:

1. Arabic numeral prefix to each name is a unique number for each individual.
2. Names with a plus + prefix means that the name will appear again in later generations, in reference to their children.
3. Roman numeral prefix is the order of birth for siblings.
4. Small superscripted numbers indicate generational level of individuals.
5. Parenthetized names after emboldened name are forebears or bloodline of individual.
6. All years shown are estimated date of births (DOB) when prefixed by Abt (about).
7. Where full names are unknown, XXX are used, or descriptive titles such as “MariaPa”, who would be the father of the known “Maria”.

We enjoin the clan members to make corrections/updates as may deem fit, such as filling in the correct names, DOBs, additional children and/or siblings, preferred deletions, etc. If sent back to <[ferngil@aol.com](mailto:ferngil@aol.com)>, we will update the database and reissue a new printout.

Last portion is the index which lists all the members alphabetically, and their corresponding reference number.
