

ARNAIZ FAMILY TREE

Ver 6 –8 Feb 2012

of Tanjay/Bais, Negros Oriental

which includes members from other clans such as:

- Diaz
- Garcia
- Teves
- etc

INTRODUCTION:

This is one of the standard print-outs of the Family Tree Maker Genealogical Software.

The print-out is generated from part data recounted neighbors who lived across the “Yarda” and house where many of the Arnaiz children, and their cousins the Garcias, grew up. More recent data is from the published family tree of the Villegas clan, GED file on the Teves Tree, public domain sources on the internet such as the Facebook, and the Geni Website where about 2 dozen pages of Arnaiz data is available. And lately, email exchanges with at least 2 of the Arnaiz clan members and personal interview with Felipe Jr.

All these information has been encoded and merged into an existing database gathered over the years from various sources.

The database is a Genealogical Project to trace the inter-relational linkages between major families in the Tanjay area, by bloodline and marriage.

Unique in this database is that each individual has been assigned a birth year, which is an educated guess based on date interpolation using assumptions of sibling spacing, and child-bearing years. Such dates are prefixed by Abt (about). Where an exact date is known, the birth years of the siblings, parents and children are adjusted accordingly. Still, many of the dates may be significantly off, since the order of births of siblings may be inaccurate, and/or incomplete.

This is not the official Arnaiz Family tree, and surely lacks many more names. There most likely is an Arnaiz historian or webmaster who handles their affairs in an authoritative capacity, and most likely would include annotations, photos and historical sketches of the more prominent members of the clan.

This printout should therefore be considered as a listing of the bloodline from the earliest Arnaiz on the database, encompassing all other known members. It is presented here as an easy reference for those others who are familiar or are connected to the Arnaiz clan.

Like most family trees, accuracy cannot be ascertained especially for the older generations, as sometimes liberal assumptions have to be made.

The format of the print-out is as follows:

1. Arabic numeral prefix to each name is a unique number for each individual.
2. Names with a plus + prefix means that the name will appear again in later generations, in reference to their children.
3. Roman numeral prefix is the order of birth for siblings.
4. Small superscripted numbers indicate generational level of individuals.
5. Parenthesized names after emboldened name are forebears or bloodline of individual.
6. All years shown are estimated date of births (DOB) when prefixed by Abt (about).
7. Where full names are unknown, XXX are used, or other descriptive titles..

We enjoin the clan members to make corrections as may deem fit, such as filling in the correct names, DOBs, additional children and/or siblings, preferred deletions, etc. If sent back to <ferngil@aol.com>, we will update the database and reissue a new printout.

Last portion is the index which lists all the members alphabetically, and their corresponding reference number.
