INTRODUCTION:

This is one of the standard print-outs of the Family Tree Maker Genealogical Software.

The print-out is generated from data we encoded into the database from the MSWord files of Rodolfo “Braddock” Calumpang, who did all the original research and collation of data on his immediate forbears, and volunteered the data to us. These were merged into the Database gathered over the years from other sources. Approximated birth years were added based on “guestimates” and interpolation. A more recent source were the emailed data of Ron Jacob Calumpang who has been doing archival research of church records using more sophisticated internet-based software.

The Database is a project to trace the inter-relational linkages between major families in the Tanjay area, either by bloodline or marriage.

The Calumpang family name is very extensive, and there are many other branches in the Database that extend back in time to other Calumpang roots. Hopefully, in due time, we will be able to link more of them.

The format of the print-out is as follows:

1. Arabic numeral prefix to each name is a unique number for each individual.
2. Names with a plus + prefix means that the name will appear again in later generations, in reference to their children.
3. Roman numeral prefix is the order of birth for siblings.
4. Small superscripted numbers indicate generational level of individuals.
5. Parenthetized names after emboldened name are forebears or bloodline of individual.
6. All years shown are estimated date of births (DOB) when prefixed by Abt (about).
7. Where full names are unknown, XXX are used.

We enjoin the clan members to make corrections/updates as may deem fit, such as filling in the correct names, DOBs, additional children and/or siblings, preferred deletions, etc. If sent back to <ferngil@aol.com>, we will update the database and reissue a new printout.

Last portion is the index which lists all the members alphabetically per first name, and their corresponding number.
