

MUÑOZ FAMILY TREE
Ver 1 – 8 July 2011
of Tanjay, Negros Oriental

which includes members from other clans such as:

- Romero
- Bulandres
- Lopez
- Castil
- etc

INTRODUCTION:

This is one of the standard print-outs of the Family Tree Maker Genealogical Software.

The print-out is generated from data from such sources as the computer files of Ron Jacob Calumpang, and the family tree hardcopy volunteered by Edgar Munoz . All these were encoded and merged with the already existing database of Tanjay families.

This family can be traced further back to connect with the early Calumpang and Teves forebears but some of the linkages are conjectural.

Known birth years are listed, and all others are estimated based on date interpolation.

The format of the print-out is as follows:

1. Arabic numeral prefix to each name is a unique number for each individual.
2. Names with a plus + prefix means that the name will appear again in later generations, in reference to their children.
3. Roman numeral prefix is the order of birth for siblings.
4. Small superscripted numbers indicate generational level of individuals.
5. Parenthetized names after emboldened name are forebears or bloodline of individual.
6. All birth years shown are estimated when prefixed by Abt (about).
7. Where full names are unknown, XXX are used.

We enjoin the clan members to make corrections/updates as may deem fit, such as filling in the correct names, DOBs, additional children and/or siblings, preferred deletions, etc. If sent back to <ferngil@aol.com>, we will update the database and reissue a new printout.

Last portion is the index which lists all the members alphabetically, and their corresponding reference number.

This printout is one of about 20 family trees available on the Tanjay website:

www.tanjaycity.org

This website also has links with another site, Tribalpages, that has over 90 family trees that can be viewed interactively.
